User Description:

This report is designed for Joint Accident Prevention Committee (JAPC) meetings. The intent of the report is to list all injuries in which reports were created between the time periods specified above. The report includes all injury reports submitted that occurred in the specified port, including travelers.

Create Date Range Logic: This report lists all injuries for the specified port that were created (or entered into) in the PMA Accident Prevention Database between the time periods specified. The report may include injuries that occurred in previous months, but were recently submitted to PMA. The intent of this create date range logic is to ensure that late submissions do not get missed in the monthly JAPC reporting cycle.

The report prints the name of the company submitting the report unless that parameter is set to: N  
The report does not include Non-ILWU or Watchman injuries unless those parameters are set to: Y
